PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building cross-platform mobile applications using Flutter and Dart. Skilled in Clean Architecture, Bloc/Cubit state management, Firebase, Supabase, REST API integration, and scalable mobile UI development. Experienced in authentication, cloud databases, storage, maps and location services, localization, and AI-powered receipt data extraction. Focused on maintainable, production-ready code and reliable user experiences.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter
State Management: Bloc, Cubit
Architecture & Design: Clean Architecture, MVVM, Repository Pattern
Backend & Database: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging, Supabase, Supabase Storage, Supabase Edge Functions
Networking & APIs: REST APIs, Dio, Retrofit, Freezed, JSON Serializable, Pretty Dio
Maps & Location: Google Maps SDK, Geolocator, Geocoding, flutter_map
AI & Data Extraction: AI-powered receipt scanning, OCR, structured data extraction
Authentication & Security: Email/Password, Google Sign-In, Facebook Sign-In, OTP, Secure Storage, Shared Preferences
Navigation & Dependency Injection: GoRouter, GetIt
Tools: Git, GitHub, Postman, VS Code, Android Studio
Testing & CI/CD: Unit Testing, Widget Testing, GitHub Actions
Payments: Stripe
Localization: Arabic RTL, English, AR/EN Localization

PROFESSIONAL EXPERIENCE

Flutter Developer Intern — Huma Volve, Cairo, Egypt | Jan 2025 – Apr 2025

- Built 6+ reusable Flutter UI components, reused across 2+ apps (Grocery App, HabiSpace), reducing code duplication and improving feature delivery.
- Integrated 7+ REST API endpoints using Dio within a Clean Architecture codebase.
- Developed 5+ feature modules using Bloc/Cubit state management to improve maintainability and application state handling.
- Participated in weekly Agile code reviews with senior developers and applied Flutter and Dart best practices.

PROJECTS

Sakk — Smart Warranty Management App

Technologies: Flutter, Dart, Clean Architecture, Bloc/Cubit, Supabase, Edge Functions, AI/OCR, GoRouter

- Engineered a mobile warranty management application covering 4 core modules (products, purchases, receipts, and warranty periods) for organized, end-to-end warranty tracking.
- Automated AI-powered receipt scanning and structured data extraction with 98% accuracy to identify product, purchase, price, and warranty information.
- Built 2 Edge Functions and a 3-table Supabase database, alongside Authentication and Storage, for cloud-backed application services.
- Designed a scalable Flutter architecture using Clean Architecture and Bloc/Cubit, with Arabic RTL and English localization.

Delivery App

Technologies: Flutter, Firebase Authentication, Google/Facebook Sign-In, Google Maps, Geolocator, Retrofit, Dio, Freezed, Bloc/Cubit, GetIt, AR/EN Localization

- Delivered a 10-feature food delivery application including 3 authentication methods (Email, Google, Facebook), location selection, reverse geocoding, cart management, and end-to-end order flow.
- Structured 15+ screens using Clean Architecture and reusable Flutter components.

Doctor Booking App

Technologies: Flutter, Firebase Authentication, Cloud Firestore, Supabase Storage, Bloc/Cubit, Clean Architecture

- Designed and developed a role-based appointment booking application with 2 dedicated dashboards (Patient and Doctor) for streamlined scheduling.
- Tested real-time booking management across 15 doctor and 15 patient profiles using Firestore, plus doctor profile image uploads via Supabase Storage.

HabiSpace

Technologies: Flutter, Firebase Authentication, Firebase Cloud Messaging, Bloc/Cubit, Dio, GoRouter, flutter_map, Google Sign-In, Secure Storage, GetIt, Stripe

- Created a real estate mobile application combining 6 key features: map-based property search, Google authentication, push notifications, deep linking, 3D model previews, and AR/EN localization.

- Integrated Stripe payment processing to enable secure in-app transactions.

Islamic App

Technologies: Flutter, Bloc, Dio, Geolocator, flutter_qiblah, AudioPlayers, Local Notifications, Alarm Manager

- Architected an Islamic utility application combining 5 integrated features: prayer time calculations, Qibla compass, Azan audio playback, scheduled notifications, and Quran reading with Arabic font support.

Grocery App

Technologies: Flutter, Bloc/Cubit, Dio, GoRouter, Secure Storage, OTP/Pinput, Image Picker, Skeletonizer, GetIt, GitHub Actions

- Shipped a 13-feature e-commerce grocery application including OTP phone authentication, secure token storage, product browsing, skeleton loading states, and image upload functionality.
- Set up a 3-stage GitHub Actions CI/CD pipeline (lint, test, build) to automate builds and streamline release workflows.

EDUCATION

Bachelor's Degree in Computer Science — Modern University for Technology & Information (MTI), Cairo

Oct 2019 – Jun 2023 | Project Grade: B+ | Graduation Project: Realtime Surveillance System

TRAINING

Flutter Development Bootcamp — e_Youth (Remote) | Apr 2025 – Aug 2025

LANGUAGES

Arabic — Native | English — Conversational
